D'où ous pouvons en déduire les matrices A,B,C,D et la commande u qui nous reste à définir tel que :

$$x = \begin{pmatrix} \theta \\ \phi \\ \dot{theta} \\ \dot{phi} \end{pmatrix} y = (\theta)$$

$$\begin{cases} \dot{x} = A * x + B * u \\ y = C * x + D * d \end{cases}$$

Les matrices A, B, C, D, Obet Cos ont disponibles dans le fichier Matlab
